SUBJECT INDEX

Ammonia,
A modified sum rule equation for the atomic tensors occurring in the theory of vibrational circular dichroism (VCD). Application to the atomic tensors recently calculated for ammonia, 35
Analytical properties,
Analytical properties of molecular harmonics, orbitals and potential energy surfaces, 235

Canonical force fields,
Some properties of regular and canonical force fields, 145
Chloromethyl difluorophosphine,
Spectra and structure of organophosphorus compounds. XLV. Vibrational spectra, conformational stability, ab initio calculations, and vibrational assignment of chloromethyl difluorophosphine and chloromethyl difluorophosphine-d_2, 305
Chloromethyl difluorophosphine-d_2,
Spectra and structure of organophosphorus compounds. XLV. Vibrational spectra, conformational stability, ab initio calculations, and vibrational assignment of chloromethyl difluorophosphine and chloromethyl difluorophosphine-d_2, 305

Ethylene,
An ab initio examination of the harmonic frequencies of ethylene and its isotopomers, 179
Exclusion principle,
Exclusion principle and indistinguishability of identical particles in quantum mechanics, 187

Hydrocarbons,
Structural analysis of molecules from their Raman spectrum, 1
Hydrogen bonds,
Electron-optical parameters of hydrogen-bonded water molecules, 211

Impurity crystals,
Transform theory for resonant Raman spectra of impurity crystals, 197
Indistinguishability,
Exclusion principle and indistinguishability of identical particles in quantum mechanics, 187
Isotopomers,
An ab initio examination of the harmonic frequencies of ethylene and its isotopomers, 179
Inverse isotopic shifts in the vibrational spectra of the isotopomers of methanimine, $H_2C{=}NH$, 161

$KLiNa^+$,
Variational calculations of rotationally resolved infrared properties of Li_2Na^+, $LiNa_2^+$ and $KLiNa^+$, 73

Large molecules,
Engineering calculations of optical spectra of large molecules and polymers, 111
Lattice dynamics,
Internal coordinates in problems of lattice dynamics, 51
Li_2Na^+,
Variational calculations of rotationally resolved infrared properties of Li_2Na^+, $LiNa_2^+$ and $KLiNa^+$, 73
$LiNa_2^+$,
Variational calculations of rotationally resolved infrared properties of Li_2Na^+, $LiNa_2^+$ and $KLiNa^+$, 73

Methanimine,
Inverse isotopic shifts in the vibrational spectra of the isotopomers of methanimine, $H_2C{=}NH$, 161

Molecular electronic structure,
Calculation of molecular electronic structure with the help of the Σ-separation method: preliminary results and prospective development, 265
Monosaccharides,
Vibrational spectra and conformations of mono- and polysaccharides, 347

Osmium nitrosyl complexes,
Vibronic theory of normal and anomalous bond angles in heteroligand complexes with multiply-bonded ligands: osmium and ruthenium nitrosyl complexes, 133

Polyatomic molecules,
Semiempirical models in theory of intensities of rotation–vibration spectra of polyatomic molecules, 95
Variational method of computing vibrational structure of the electronic spectra of polyatomic molecules, 283
Polymers,
Engineering calculations of optical spectra of large molecules and polymers, 111
Polysaccharides,
Vibrational spectra and conformations of mono- and polysaccharides, 347

Regular force fields,
Some properties of regular and canonical force fields, 145

Rotational isomerism,
Structural analysis of molecules from their Raman spectrum, 1
Ruthenium nitrosyl complexes,
Vibronic theory of normal and anomalous bond angles in heteroligand complexes with multiply-bonded ligands: osmium and ruthenium nitrosyl complexes, 133

Σ-separation method,
Calculation of molecular electronic structure with the help of the Σ-separation method: preliminary results and prospective development, 265

Tikhonov's regularization method,
Regularizing algorithms for molecular force field calculations, 13

VCD,
A modified sum rule equation for the atomic tensors occurring in the theory of vibrational circular dichroism (VCD). Application to the atomic tensors recently calculated for ammonia, 35

Water molecules,
Electro-optical parameters of hydrogen-bonded water molecules, 211
